Turn On the Display

Using the “Display” (Pioneer) remote, press the “Standby/On” button (A).

Laptop Presentation

1. To display an image from a laptop, connect the “Laptop Connector for Presentation” cable located at the front of the room to the VGA output on the laptop.

   *Note: This is a different connector from the “Laptop Connector for VTC.” See the “Video Teleconferencing Directions” sheet.*

   If needed, use the proper key sequence on the laptop to switch the video signal to laptop video output.

2. Select button 1, Laptop, from the Input section on the Display remote (B).

3. If you have sound in your presentation, insert the cable labeled “Laptop Audio” into the headphone jack on the laptop.

   Volume can be controlled through the display by using the remote (C) and by the laptop controls.

VCR/DVD Playback

1. To show a video through the VCR/DVD player, select button 4, DVD/VCR, from the Input section on the Display remote (B).

2. Use the “VCR/DVD” (Toshiba) remote to control the VCR/DVD player.

When Finished

1. Using the “Display” (Pioneer), press the “Standby/On” button (A).

2. Turn off the lights if no one is using the classroom afterwards.
