Human Ecology students come to the college with deep interests in community engagement. Below are Human Ecology specific organizations in which students participate to further develop their academic interests and goals and to be good citizens of the college.

American Society of Interior Designers (ASID) is a community of people driven by a common love for design and a commitment to the belief that interior design as a service to others, is a powerful, multi-faceted profession that can positively change people's lives. Through education, advocacy, community building and outreach the society strives to advance the interior design profession and, in the process, to demonstrate and celebrate the power of design.

Association for Students of Color (ASC) unites Human Ecology students of color to provide a supportive foundation for their enrollment, retention, graduation, and career placement. ASC members work toward these goals by participating in on-campus hosting programs, high school visitations, and sponsoring alumni career forums. Members provide volunteer services to the Cornell and Ithaca communities and host annual fall and spring events.

Cornell Fashion Collective (CFC) was formed to provide students interested in designing apparel an opportunity to express their creativity outside of the classroom by producing a fashion show each spring. Concerned with all aspects of professional presentation, the annual show provides a creative outlet for those interested in graphics, photography, and theater production. A majority of CFC fashion designers are part of the Fiber Science & Apparel Design Department, but the organization welcomes full-time students from all Cornell majors and schools.

Health and Nutrition Society (HealthNuts) is an undergraduate service organization that supports health, nutrition, and wellness on the Cornell campus and in the Ithaca community. Members produce a campus-wide newsletter about health and nutrition called *Mastication*, hold fundraisers to benefit organizations such as Loaves and Fishes, a local soup kitchen, and to donate food to GIAC, an after school tutoring program. The organization goals are to provide opportunities for students to interact with the academic community by organizing Faculty-Student Coffee hours and to collaborate service efforts with other health-oriented student groups. Health Nuts is open to all Human Ecology students.

Human Ecology Ambassadors is a group of Human Ecology students who serve as liaisons between the College and prospective students and their families. Ambassadors provide the student voice in the admissions process and support recruitment and yield activities for each incoming freshman and transfer class. New Ambassadors are selected during the fall semester.

Human Ecology Peer Partnership Program was created to help incoming students of color with the transition to the college and university. Small groups of freshman and transfers, usually about 6-8 students, are partnered with faculty and upper class students. They meet weekly for discussions, guidance, and explorations of the Cornell campus and community.

Human Factors and Ergonomics Society (HFES) has a Cornell chapter that consists of a group of students and faculty interested in human factors and ergonomics. The organization, based in the Department of Design and Environmental Analysis, plans and coordinates events and activities that include invited speakers, practical demonstrations of ergonomic design principles, and field trips. The chapter contributes to the CUergo website and has established an information library in the DEA Resource Center.

International Facility Managers Association (IFMA) helps students who are interested in the field of facility planning and management explore the profession and stay current with the latest issues in the field. Chapter activities include speaker events, field trips, and joint meetings with other professional association chapters. Student members also have access to the IFMA research library, scholarships, educational events, and IFMA publications.

Kappa Omicron Nu (KON) is the Human Ecology honor society that recognizes academic excellence. As a chapter of the national honor society, KON empowers leaders through scholarship, research, and leadership development. Induction ceremonies are held in the fall and spring semesters. Select sophomores, juniors, and seniors are nominated based on their GPA.

Orientation Committee recruits, trains, and supervises student orientation staff members in support of our new students. Committee members plan recruitment, and design and conduct training during fall and spring semesters. During August and January orientation periods, committee members lead the student staff as they play critical roles in welcoming and assisting new Human Ecology students.

Pre-professional Association Towards Careers in Health (PATCH) provides support, advising and up-to-date information to Human Ecology students pursuing careers in health care. Programs include academic advising; guest speakers on allopathic and alternative medicine; career options; information on medical school admissions, MCAT preparation, research, and internships, and a visit to a local medical school. This student organization is sponsored by Human Ecology.
